Multi-year and multi-location information is a better predictor of future performance. An individual plot may have been excluded from the website based on criteria that led LG Seeds to believe that the results, good or bad, do not accurately represent a product. In addition, a grower may not have provided consent to release performance information. Hybrid and variety responses are variable and subject to any number of environmental, disease and pest pressures.

Do not use this or any data from a limited number of demonstration trials as a significant factor in product selection. Testing accuracy, area variations, and a limited environmental base can give misleading results. See your LG Seeds dealer for product recommendations for your local conditions.

Advantage Acre's comprehensive suite of technologies turns knowledge into power with tools including: in-depth product information, innovative soil mapping technologies, advanced weather forecasting and variable rate planting and nitrogen recommendations.
